

weber.dry silica sand

Silica sand for polyurethane system of waterproof coating.

Technical Data Sheet

Issued on:

Revision No:

Description

Sorted silica sand with size of 0,3 – 0,5 mm, used for the application of **weber.dry PUR coat** and **weber.dry PUR coat traffic**.

Advantages

- To prevent slip on the vehicle tires and pedestrian.
- Increase the surface friction.

Application

- weber.dry silica sand is sprinkled on top of the second layer of **weber.dry PUR seal**.
- Make sure that part of **weber.dry PUR seal** is sprinkled with **weber.dry silica sand** evenly, and then after it dries, clean the remaining of **weber.dry silica sand** using vacuum cleaner or brush.
- After it dries, apply the top coat.

Application Substrate

weber.dry PUR seal

Packaging

40 kg of woven sack.

Color

Cream / Ivory white.

Application Tools

Vacuum, brush.

Storage Time

12 months after the production date at dry and free from moist condition, must be kept away from direct sun light. Storage temperature must be between +5°C and +35°C. The packaging must be sealed when it is not used. Packaging must be kept away from frost.
